- Fisheye lens
- Wide angle lens
- Macro lens
- Universal clip
- Lens protectors
- Storage pouch
- Cleaning cloth
- Manual

FISHEYE

Approximately 180° Field-of-View. Screw the fisheye lens to the universal clip.

MACRO

Incredible focus distance of 1/2" (13mm) for some amazing 10X shots. Screw the Macro lens to the universal clip.

Note: Make sure you don't block your light source and remember to have the lens about 1/2" (13mm) from your subject.

WIDE-ANGLE

Expands the native viewing angle by 2X, allowing you to get closer to the subject while still being able to fit everything into the picture.

Screw the Macro lens to the universal clip first and then screw the wide-angle lens on top of the macro lens.

WARNINGS

Use the lens covers provided during storage or during transportation to prevent damage (including scratching, etc) of lenses.

Use cleaning cloth to clean the lens.

Use lens cleaning solution if needed.

Do not store any of the lenses in direct sunlight.

Do not screw the lens (especially the macro lens) on the clip too tight, as it will be difficult to unscrew.
